# IIOT Pro

Compliance Without Complications

IIoT Fast and Simple

No need to integrate into internal systems to get started. Just get effective and simple notifications from a preconfigured Gateway and a sensor instantly. Most important; set all of it up within a few days! Over 100 Sensor types ready for instant shipment.

Push and eMail Notifications

Anyone can be assigned to receive Push Notifications and/or emails to receive alerts from sensors. Service Technicians have direct access to Equipment IIot (sensor) status through the mobile app.

Template Driven

Incheq turns PDF's, Photo's and instruction manuals with all the latest checklist info into templates for you. Templates can be duplicated and modified a million times without losing the original. How cool is that!

Unlimited Users / Shared or Dedicated

Nothing can be more frustrating than user management. Incheq bypasses that by allowing unlimited users. Incheq charges simply per location and volume of items. Share access with clients, give them full control, or just send them reports... your choice.

Report and/or Export

Incheq allows live views and push notifications of progress for each Unit and person's completed tasks. Its modern web architecture also allows for exchange of data with other platforms.

Costs

IIOT costs are based on volume of Sensors and Hubs as well as (advanced) feature sets.
