

# Scan... and Go!

## Compliance Without Complications

### Self Scheduling in Space

Any Space Cowboy can scan a QR and schedule available tasks for themselves. Incheq records who did it, the result and at what time and place in space it was done.

### Self Sign-up in Space

Space tourists as well as professional astronauts can scan a QR and sign-up to get started with completing routine tasks instantly. No need for database syncing and imports.

### Template Driven on Earth

Incheq turns complicated system data, spreadsheets and paper checklists into templates for you. Templates can be duplicated and modified a million times without losing the original. Checklists and tasks will get the latest updates automatically when templates are updated.

### Unlimited Users in Space

Nothing can be more frustrating than user management. Incheq bypasses that by allowing unlimited users. Incheq charges simply per location and volume of items to manage.

### Report and Get Notified On Earth

Astronauts want to be able to get to their breaks and team fun activities on time. Incheq's automatic reporting and live activity tracking is ideal for the managers who track progress on earth especially if they want instant push or e-mail notifications of major events!

### Costs on Earth

Incheq's per Space Station charges can be as little as \$49 per month.
